Projects

Car Rental System
Repository: https://github.com/seifmamdouh11/rentcar
Live Demo: https://seifmamdouh11.github.io/rentcar/

- Developed a responsive frontend car rental system using React with reusable, well-structured components

- Integrated APIs to display dynamic rental data and update UI content

- Implemented client-side routing to manage multiple views within the application

- Built reusable and responsive UI components using Bootstrap and custom CSS

- Applied clean component architecture and basic state handling to ensure maintainability
